

Mosquito Fortress MAX

THE **NATURAL** CHOICE IN MOSQUITO REPELLENTS

Mosquito Fortress MAX is an all natural, biodegradable, granular formulation with a pleasant odor. The active ingredients in **Mosquito Fortress MAX** mask human odors and make mosquitoes uncomfortable, causing them to leave the area. **Mosquito Fortress MAX** will not harm flowers, shrubs, lawns or soil.

Mosquito Fortress MAX should be applied according to the label instructions, by responsible persons to areas where mosquito populations interfere with outdoor activities. Suggested areas include, but are not limited to: Yards, Decks, Residential Areas, Subdivisions, Towns, Businesses, Parks, Ball Fields and School Grounds.

100% ALL NATURAL INGREDIENTS

Active Ingredients: 7.2% (Lemon Grass Oil 3.1%, Citronella Oil 2.9%, Cedar Oil 0.9%, Clove Oil 0.3%)

Inert Ingredients: 92.8% (Cellulose, White Mineral Oil, Lecithin)

APPLICATION INSTRUCTIONS: Apply to dry ground at a rate of 1 to 2 pounds per 1,000 square feet. Apply product throughout the occupied area as well as 5 to 10 feet beyond the perimeter. A liberal rate should be applied under shrubs and in tall vegetation. The combination of coarse and fine granules will begin releasing a mosquito-repelling odor that is effective within minutes and will last over a period of a few days to over 2 weeks depending on weather conditions.

Recommendations for use are based on tests believed to be reliable. The buyer must assume all risks and responsibilities for the use of this product when not used strictly in accordance with label directions or established safe practices, or when used under abnormal conditions.
