

BONIDE MOSQUITO LARVICIDE can be used all season long; does not depend on life cycle timing for effectiveness. It kills by suffocation and mosquitoes do not develop resistance. The last application of the season is as effective as the first. Does not smear or deface the environment with dark oily films or residues.

DIRECTIONS

BONIDE MOSQUITO LARVICIDE is designed for surface application to intermittently flooded areas, temporary rain pools, sloughs and log ponds. Mixture with water (milky appearance) should be avoided or minimized. Avoid solid stream, high pressure or high velocity applications. Adjust spray nozzle for partial cone pattern. Equipment used to apply other materials should be cleaned by rinsing with diesel fuel or fuel oil, then with larvicide.

GROUND APPLICATION: One to five gallons per acre depending on water surface conditions and vegetative density. Use one to 2½ gallons per acre if trees are in green tip stage and vegetative cover is light and water is essentially clean. To penetrate heavier or denser vegetative cover, or if water is substantially polluted, use 2½ to 5 gallons per acre. An average rate of 2½ to 3 gallons per acre (approximately 1 quart to 5,000 sq. ft. = 50' x 100' area or 2 to 4 teaspoons per 100 sq. ft. = 10' x 10' area) of water surface covers most conditions.

AERIAL APPLICATION: Two to four gallons per acre for salt marshes and swamps. Adjust for vegetation or surface conditions. Average rate of 3 gallons per acre (36 gallons per 100 ft. swath mile) covers most conditions.

Apply to leave a thin film over surface of breeding areas. Include treatment of drainage ditches, catch basins, stagnant pools, open sewage basins to improve overall control. Since high pressures or high velocities are not needed, lighter less expensive equipment can be effectively used. Since mosquitoes can hatch in 5-7 days of warm weather, any stagnant water expected to be exposed for that period or longer should be treated.

BONIDE®

MOSQUITO LARVICIDE

For use on sewage and drainage ditches, catch basins, salt marshes, swamps and stagnant water pools. **KILLS LARVAE AND PUPA STAGES OF MOSQUITOES**

EPA Est. No. 4-877-1 EPA Reg. No. 4-195
ACTIVE INGREDIENTS: *DELTAMETHRIN*
INERT INGREDIENTS: *DELTAMETHRIN*

KEEP OUT OF REACH OF CHILDREN

CAUTION

See label panel for additional precautionary statements.

CONTENTS: 1 Quart (32 Fl. Oz.)

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS—CAUTION

Avoid breathing spray. If swallowed, do not induce vomiting. Notify physician.

ENVIRONMENTAL HAZARDS

Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Storage: Store in a cool dry place inaccessible to children or pets. Avoid contamination of feed and foodstuffs.

Container Disposal: Do not reuse container. Wrap in paper and discard in trash.
