PHYSICAL AND CHEMICAL HAZARDS

Flammable. Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry place, in an area inaccessible to children or pets.

DISPOSAL: Do not reuse empty container. Securely wrap in newspaper and discard in trash.

Mosquito Beater® is quick and easy to apply. It is ready to use: no mixing, no water. Simply broadcast granules on the ground or apply with a lawn spreader, dust gun or hand crank duster.

Starting with one hour after application, one treatment can be completely effective for up to two days, and can continue to provide excellent results for up to eight days, depending upon rainfall and wind currents which contribute to reinfestation.

As the action of Mosquito Beater® depends upon release of active ingredients in the vapor phase, air movements affect results considerably. Best results in small areas are obtained in quiet or relatively still air, such as occurs during early evening periods. Application should be made about an hour before the area is occupied. During periods of light to medium air currents allow a longer period prior to occupancy or treat an area large enough to overcome localized effect of breezes. (See diagram for suggested application techniques.) As a rule, the air is sufficiently still when Mosquito Beater® fragrance can be detected while standing in the treated area to be occupied.

Apply at the rate of one half cup per 10 foot by 10 foot area. Do not overdose desirable lawn areas. In case of overdose disperse granules with spray from garden hose. Always treat an area considerably larger than that to be occupied, usually not less than 100 feet by 50 feet or 70 feet by 70 feet and preferably double this area for best overall results. Apply liberally to moist dark areas of heavy growth. Will not harm flowers, shrubs, lawns, soil or the user. Repeat application when area becomes reinfested.

Recommendations for use of this product are based upon tests believed to be reliable. The buyer must assume all responsibility for use of this product when not used in strict accordance with label directions or established safe practice, or when used under abnormal conditions not reasonably foreseeable to the seller. This product does not conform to EPA standards for performance for area control or repellency of mosquitoes.
